Field	Description
Defect ID	FK-V365-001
Title	Incorrect Product Categories Displayed in Flipkart Value 365
Description	When users navigate to the Value 365 section and select categories such as Toys and Beauty, unrelated products from categories such as Electronics and Home Appliances are displayed. The selected category does not consistently show relevant products.
Steps to Reproduce	1. Open the Flipkart application or website. 2. Navigate to the Value 365 section. 3. Select the Toys category. 4. Observe the products displayed. 5. Navigate back and select the Fashion category. 6. Observe the products displayed. 7. Repeat the same steps for the Beauty category. 8. Compare the displayed products with the selected category.
Expected Result	The application should display products relevant to the selected category
Actual Result	Products from unrelated categories, such as Electronics and Home Appliances, are displayed instead of the expected category-specific products
Environment Details	Application: Flipkart Module: Value 365 Platform: Android Device: Samsung M52 5G Android Version: Version 13
Severity	Major
Priority	Medium
Module / Feature Affected	Value 365 – Category Navigation / Product Listing
Reported By	Sivabharathi
Reported On	20-Oct-26
Attachments	Screenshots / Screen Recording showing the selected category and unrelated products
Status	New
Assigned To	Development Lead/Developer name(unassingned)
Comments / Notes	Reproduce the issue across Toys, Fashion, and Beauty categories. Record the affected categories and repeatability. Confirm the issue persists after refreshing the page or reopening the app.
